

LET'S KEEP AMERICA ROLLING!

GET \$200 OFF OUR FULL SERVICE OEM DPF CLEANING!

Save BIG when you complete a Full Service DPF cleaning in May 2020.

At Advanced Emission Control Solutions, it's important that we keep America's trucks and fleets rolling without interruption. To show our support, we're offering a special discount on our Full Service OEM DPF Cleaning.

How Do You Know When Your DPF Needs Cleaning?

- Poor Engine Performance
- Frequent Regeneration Cycles
- DPF Dashboard Warning Lights

We recommend scheduling DPF cleaning at 150,000-mile intervals, because extensive research and testing concludes that ash begins to harden in the filter cells at this point.

Call Stephen Davis at (559) 240-6076 to schedule your OEM DPF Cleaning today & save \$200 on our Full Service DPF Cleaning.

FUEL DOZER/ 7TH INJECTOR CLEANING/MAINTENANCE

Our technicians carefully remove the Fuel Dozer/7th Injector to clean & check the status. If the injector is no longer serviceable, we replace it with a new one ensuring long-term high performance on the road.

DPF CLEANING

We thoroughly clean your DPF using the only OEM-approved, advanced FSX DPF cleaning process that uses the only industry-approved test bench to accurately certify the success of cleaning.

REINSTALL & TEST

Our maintenance experts reinstall the DPF with new gaskets/parts & connect our diagnostic equipment to your truck's computer to check the performance. We reset the metric back to zero and run through a regen check to ensure maximum performance.
