

# WHY RETROFIT?

## DEQ DIESEL GRANT PROGRAM PROVIDES FREE RETROFITS FOR QUALIFYING OREGON SCHOOL BUSES!

As of October 1, 2020, the DEQ has opened the Diesel Grant Program to all previously non-selected school districts to award the unused allotments.

Under this program, school districts have the option to install diesel particulate filters or to scrap and replace buses in their fleet. Buses selected for replacement must have at least 3 years of remaining useful life, have operated in Oregon in the past year, and will continue to operate in Oregon for at least the three years following.

***It is our understanding that if the school district does not retrofit their buses by 2025, these buses must be replaced. By completing a retrofit now, there is no end date for these buses.***

***Take action now to bring new life to your fleet!***
